FEL-PRO®
THE GASKETS PROFESSIONALS TRUST™

Engine Repair
Full Sets (FS)

The Complete Solution

Fel-Pro® Full Sets are available primarily for older vehicles. They provide every gasket necessary for upper and lower engine work, usually a total engine overhaul. The proliferation of engine types in late-model vehicles has made it generally impractical to offer Full Sets for each type. Stocking Full Sets for each would require more shelf space than most parts stores have available.

Fel-Pro has solved this problem by offering Head Sets for the upper engine work and Conversion Sets for lower engine work. Combined, these two sets constitute a Full Set. Combining the two sets provides the technician with all of the gaskets he needs, while alleviating an inventory issue for the parts store by allowing flexible options for fulfilling customers' sealing needs.

HEAD SET (HS) + **CONVERSION SET (CS)** = **FULL SET (FS)**
