

Remanufactured **STEERING**

CARDONE Remanufactured Steering Products are the result of years of research and process development aimed at producing the highest quality products in the aftermarket. Reverse engineering provides insight into why a product fails and allows us to improve upon any original design flaws - often resulting in products that perform better than O.E. Computerized testing and on-car validation ensures that every unit meets fit, function and performance requirements.

- Rack and pinion sleeves are installed using an exclusive bonding process to ensure sleeves never come loose.
- All critical components are tested multiple times before leaving the remanufacturing facility to ensure exceptional performance.
- All salvageable power steering shafts are completely machined to attain a surface finish that matches original tolerances.
- Unit is completely disassembled, cleaned and examined for wear and breakage.
- Worn out, missing or non-functioning components are replaced with new or rebuilt components.
