

New MOTORS

CARDONE New Motors are grounded in the same reverse engineering competencies that have made our remanufactured products synonymous with quality. Every unit is designed to match O.E. fit, function and performance standards. With 100% computerized testing, CARDONE New Motors provide reliable performance you can trust.

- Original design weaknesses are corrected to make a longer lasting part.
- All replacement components are O.E. quality.
- All critical components are tested to guarantee like-new performance.
- Units are computer tested, both as sub-assemblies and as complete units to ensure reliability.
