

DORMAN CERAMIC HEADLIGHT SOCKETS

SUPERIOR THERMAL PROTECTION FOR HIGH-PERFORMANCE LIGHTS

The high operating temperatures generated by LEDs and other high-performance lighting can cause standard wiring and sockets to fail from heat. Dorman's ceramic headlight sockets offer the greatest thermal protection to prevent damage to wiring and connectors.

IDEAL FOR LED APPLICATIONS

Ceramic insulation – protects terminal and wiring from excessive heat

Complete replacement – includes new socket and wiring

Easy to install – pigtail wiring splices into factory harness for a reliable repair
