PTC Adds 55 New Transmission Filter Kit Numbers

PTC is pleased to announce the recent addition of 55 new Transmission Filter Kit numbers that now in stock and ready to ship. This includes late model BMW applications with the integrated filter/pan design. Additionally 20 new ACCOPAC transmission pan gasket numbers are scheduled to be released soon. Stay tuned!

With the addition of these new numbers, PTC now offers one of the most comprehensive offerings in the industry, with over 330 sku's now available.

The transmission is one of the most neglected parts of regular automotive maintenance. Premature transmission failure can be easily prevented by making sure to change the fluid and filter per the OE manufacturer maintenance cycles. PTC automatic transmission filters help keep your transmission running smoothly by catching foreign particles, varnish and sludge, while allowing the transmission fluid to lubricate and cool critical moving parts.

New F325
BMW Integrated Filter/Pan Design

PTC offers select hard to get import filter kits previously only available thru OEM channels.

What's does your supplier offer?
