

# THE **CLEAN** PLAN

**SAVE AT THE PUMP**

**REDUCE EMISSIONS**

**CONSERVE ENERGY**

**IMPROVE ENGINE PERFORMANCE**

*Developed by a basic manufacturer  
of premium quality fuel injectors*

# The Clean Plan Partnership

**A partnership between the motorist and their trusted professional technician.**

Most motorists know to have their filters checked regularly and have their motor oil changed every 3,000 miles, but many don't know they need to maintain their fuel injectors too. That's where the Clean Plan can help.

The Clean Plan is a comprehensive fuel injection cleaning program that combines motorist preventative maintenance with a regular professional cleaning.

*Pour-in-the-Tank  
Clean Formulas  
for Motorists*

Motorists, pour Super Clean Advanced Formula or EZ-Pour Clean into your full tank every 5,000 miles and see your trusted technician yearly for a professional cleaning. You'll enjoy improved drivability and performance from this 'fuel system tune-up' along with better gas mileage, reduced emissions and 'at-the-pump' savings. And a smoother running vehicle with better mileage makes everyone happy!

# Why Clean?

## Why, because fuel injectors get dirty!

Over time, deposits build up on injector nozzles altering the spray volume and pattern. These deposits come from additives used in gasoline. As injectors get clogged, a vehicle may hesitate, stumble, suddenly lose power, idle rough or be difficult to start. By removing the deposits, the injectors work efficiently, the engine receives proper fuel delivery resulting in maximum vehicle efficiency, power and performance.

### *Enhanced Clean Professional Fuel System Cleaning Kits*

*The expanded Clean Family of Chemicals has improved formulas in color-coded packaging*

# Ultra Clean FI Cleaning System

**The new standard in fuel system cleaning.** Re-engineered, the new Ultra Clean kit meets the needs of today's technician with a redesigned canister and gauge for the most accurate readings, plus an advanced quick-disconnect system for easy adapter hook-up and maximum efficiency. The Ultra Clean system uses your shop air to clean fuel injectors even faster and more efficiently eliminating the need for aerosol disposal.

**IMPROVED**

CST100CQ

The enhanced Ultra canister and gauge (CST600CQ) is included in the CST100CQ kit.

# ***Ultra Clean Kit Features & Benefits***

## **Our best 'shop air' fuel cleaning system just got better.**

- New Quick-Disconnect System for easy adapter hook-up.
- Redesigned heavy-duty Ultra Kit canister with built-in bleed off valve to relieve pressure and gauges with protective gauge covers.
- Larger gauge assembly for a more accurate pressure reading. Large gauge reads fuel system pressure; small gauge reads canister pressure - up to 145 psi.
- Kit is updated for current model year vehicles.
- Adapters come with required hardware to cover many different fuel systems.
- Adapters are well organized with identification charts for each compartment with popular adapters mounted on outside of tool box for quick access. Hose adapters come complete with identification rings.
- Longer main feed line hose and fuel pump loop hoses for pumps that cannot be disabled.
- Includes longer fuel rail mounting bolts for applications where the OE bolts are too short.
- Throttle body "S" tool is included for cleaning intake runners.
- Printable CD manual included with each kit.
- Uses Ultra Clean fuel system cleaner (CSF53).

*The Ultra Clean system can test fuel pumps, pressure regulators, diagnose leaking fuel injectors and it contains all the components necessary to service virtually all import and domestic vehicles.*

# Pro Clean FI Cleaning System

## Our new Pro Clean cleaning system.

Completely redesigned with a new gauge and advanced quick-disconnect system, the new Pro Clean kit is the perfect solution for those technicians who require an aerosol based cleaning system.

CST100Q

- New Quick-Disconnect System for easy hook-up.
- Larger gauge for accurate pressure reading.
- Kit is updated for current model year vehicles.
- Printable CD manual included with each kit.
- Adapters come with required hardware to cover numerous fuel systems.
- Longer main feed line hose and fuel pump loop hoses for pumps that cannot be disabled.
- Longer fuel rail mounting bolts for applications where the OE bolts may be too short.
- Test fuel pumps, pressure regulators, and diagnose leaking fuel injectors.
- Uses Pro Clean aerosol cleaner (CSF56).

**CLEAN**

# Ultra and Pro Clean Upgrade Kits

**Convert your existing Ultra and Pro Kits.** Upgrade your gauges and convert your existing Clean kits to 'quick-disconnect' with our Easy-Clean update packages.

## CSTK1 Pro Clean 'Aerosol' Update Kit

Includes new gauge and regulator, main quick-disconnect feed line hose, five 1/8" male (1/4" female thread) quick disconnect adapters

## CSTK2 Ultra Clean 'Shop Air' Update Kit

Includes new threaded canister with gauge, main quick disconnect feed line hose, five 1/8" male (1/4" female thread) quick-disconnect adapters

CSTK3

CSTA90Q

CSTA91Q

## CSTK3 Main Feed Line Hose Kit

Includes main quick disconnect feed line hose, five 1/8" male (1/4" female thread) quick-disconnect adapters, one 1/8" male (1/4" male thread) quick-disconnect adapter

## CSTA90Q Quick-Disconnect Female Adapter

Converts the main feed line hose adapter end 1/8" female (1/4" male thread) quick-disconnect adapter

## CSTA91Q Quick-Disconnect Adapter

1/8" male (1/4" female thread) quick-disconnect adapter

# Ultra Clean Fuel System Cleaner

## Professional injector cleaning formula.

Ultra Clean Professional Fuel System Cleaner is the most efficient fuel injector cleaner on the market. Ultra Clean cleans fuel injectors for a more efficient running engine. This formula also helps clean the combustion chamber, intake and exhaust valves helping to restore engine power, improve performance and reduce vehicle emissions. Use with Ultra Clean Kit (CST100CQ) and your shop air.

*Clean is the ONLY professional fuel system cleaning program developed by a manufacturer of fuel injectors.*

CSF53

# **Pro Clean Fuel System Cleaner**

## **Professional aerosol formula.**

Pro Clean Professional Aerosol is a safe, effective fuel injection cleaner. Our CFC-free formula makes Pro Clean oxygen sensor and catalytic converter safe for all domestic and import gasoline engines. Pro Clean includes an intake valve cleaner additive, helping to improve drivability, gas mileage while reducing exhaust emissions. Use with Pro Clean Kit (CST100Q).

# Air Intake System Cleaner

**Works effectively on damaging deposits.**

Ultra Clean Professional Air Intake System Cleaner removes harmful deposits that rob an engine of power. Our special formula cleans throttle body plates and air passages working effectively against the heavy deposits that build up in today's advanced fuel injection engines. This oxygen sensor and catalytic converter safe formula helps clean the combustion chamber, intake and exhaust valves to help reduce emissions and restore engine performance. Use with Ultra Clean Kit (CST100CQ) and "S" Tool Adapter.

# Advanced Fuel Injection Cleaner

## Advanced pour-in-the-tank formula.

Super Clean Advanced is our best pour-in-the-tank cleaner. Used every 5,000 miles, in between professional cleanings, Super Clean Advanced keeps the entire system clean, rapidly and safely removes harmful engine deposits in injectors, valves, combustion chambers, ports and intake manifolds to restore vehicle power and performance. Regular use of Advanced will improve injector flow and fuel economy, smooth out rough idle, decrease hesitation, and reduce emissions.

**NEW**

*Super Clean Advanced formula is a complete combustion chamber cleaner that restores the entire fuel system.*

# ***EZ-Pour Fuel Injection Cleaner***

## **Pro-Grade pour-in-the-tank formula.**

EZ-Pour Clean Pro-Grade pour-in-the-tank cleaner helps avoid costly injector overhaul or replacement. EZ-Pour Pro-Grade formula cleans up to the intake valves, removing deposits in gasoline injectors that can cause sluggishness, surging, stalling, hesitation and starting difficulties. When used every 5,000 miles, in between professional cleanings, EZ-Pour will help prevent deposit formation in the fuel system, improve gas mileage and restore vehicle power.

# Fuel Tank Flush

**Professional 'No-Rinse' fuel tank flush.** Clean Professional Fuel Tank Flush with passive vapor phase anti-rust, protects the tank interior from corrosion including the head-space above fuel level. Because Clean Professional Flush is a no-rinse formula, the tank is ready to use after treatment. Use when installing new fuel pumps or during vehicle restoration. For heavily varnished tanks add a bottle of Super Clean Advanced Fuel Injection Cleaner (CSF104) along with Flush.

# Mass Air Flow Sensor Cleaner

**Clean MAF cleaner improves air/fuel ratio.** Induction Clean Professional MAF Sensor Cleaner is specifically formulated to help reduce deposits in the mass air flow sensor that lead to decreased engine performance. This unique formula contains a blend of solvents and additives designed to safely and effectively remove carbon build-up, gum and other deposits from mass air flow assemblies for improved air/fuel ratio, drivability and peak vehicle performance.
